- **Never turn on the staff or poi if you charge it.**
- **Never completely discharge the staff** - recognize according to the luminance (it saves your battery life)
- **Do not let the product in an environment of below 5 ° C** for a period longer than the period of performance.
- **Charge** – red diode - charging, green diode full recharged
- This LED product is **not waterproof nor indestructible**
- Remote control range is 5 to 15 meters depending on the battery in the remote control (CR2025 - 3V)
- Remote control has 17 dynamics modes, DEMO mode, 20 static colors, setting of intensity and blink rate

INSTRUCTION

1. the staff has two switches, one main, which can be found on a staff or poi. This switch turns on only when you want to spin. If the switch is on, the battery will slowly discharge. The second switch can be found on the remote control. This switch is used to momentarily turn off or turn on before or during spinning.
2. Control works only when the main switch is turned on.
3. Using the driver can adjust color, dynamic mode, demo mode, speed of dynamic mode and luminosity.
4. driver does not need to be aimed into the product.
5. Be careful on connectors (only Dragon staff)
6. We recommend to oil the connecting tube, if you think that insertion is harder. (only Dragon staff)
